

# MASTER- WORKS AND EECSCON: SHOWCASING STUDENTS' WORK

April 18, 2017, was a day to talk, think, and learn about student research.

Photos: Gretchen Ertl

**M**ore than 60 undergraduates spoke or gave poster presentations during EECSScon, the annual undergraduate research conference sponsored by the Department of Electrical Engineering and Computer Science (EECS) and MIT Lincoln Labs. About 45 students presented posters or demonstrations during Masterworks, the annual EECS celebration of thesis research leading to the master of science (SM) and master of engineering (MEng) degrees.

Dozens of other students, faculty members, and industry guests joined the back-to-back events on April 18 to learn about students' work (and enjoy a free lunch during EECSScon and an ice-cream buffet during Masterworks). Both events featured prizes for the best presentations. EECSScon winners received cash prizes of \$50 to \$200, while Masterworks winners received prizes donated from Apple and Samsung.
